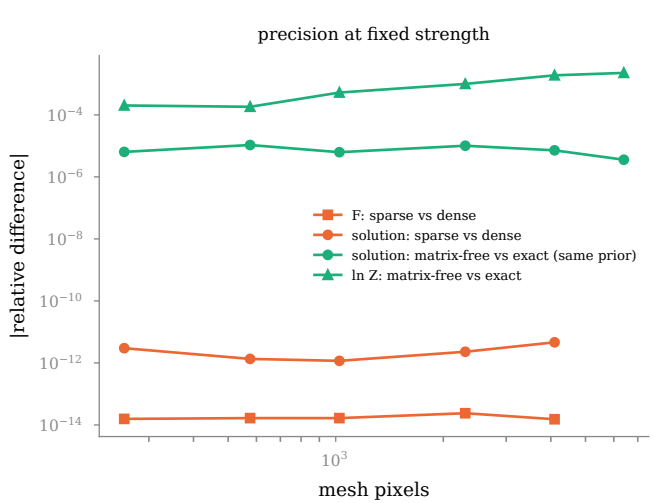
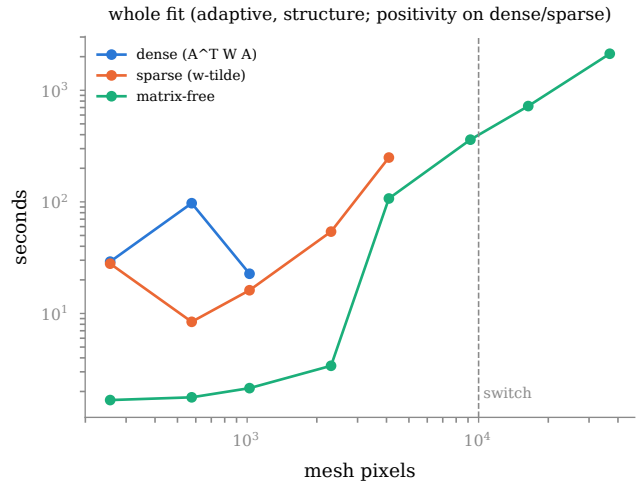
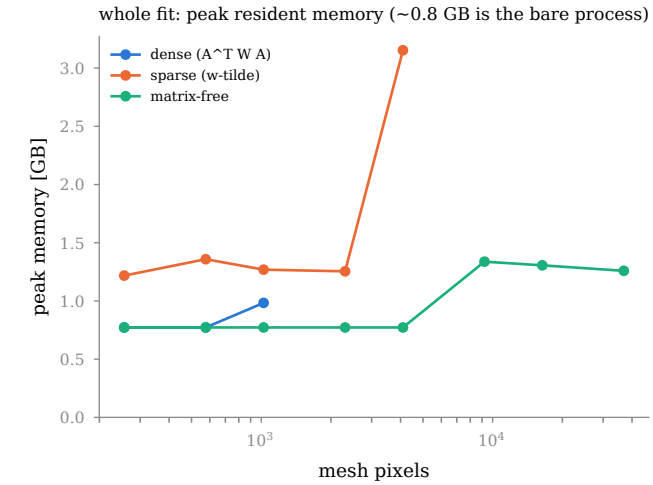
seconds
mesh pixels



precision at fixed strength
F: sparse vs dense
solution: sparse vs dense
solution: matrix-free vs exact (same prior)
ln Z: matrix-free vs exact
|relative difference|
mesh pixels



whole fit (adaptive, structure; positivity on dense/sparse)
dense (A^T W A)
sparse (w-tilde)
matrix-free
switch
seconds
mesh pixels



whole fit: peak resident memory (~0.8 GB is the bare process)
dense (A^T W A)
sparse (w-tilde)
matrix-free
peak memory [GB]
mesh pixels
